Re: Correction to FY2011 Crash Report

It has been brought to our attention that there is a mis-statement of fact in the FY2011 Crash Report. When describing the number of bicycle and pedestrian crashes vs. all crashes it is noted that Lowndes County has “much less than the state average”, when in fact this is not the case, Lowndes County has much more than the state average. 0.7% in Lowndes County vs. 0.2% in the State of Georgia.

We apologize for any confusion this may have caused.
